If the text in the line above does not look like the image in the line below
an error in the rendering of the font occurred.

14 jan 2012 **PDF/X-4** © Ghent Workgroup, www.gwg.org 9.1

Intent

This patch allows to check if embedded OpenType fonts (new in PDF/X-4) are processed and output correctly. The patch contains OpenType Type 1 (above) and OpenType TrueType (below) variants.

NOTE: Patch 9.0 allows testing for all other font formats already allowed in PDF/X-1a.

Testing guidelines

This patch can be used on it's own and amalgated with other patches on a larger patch. There are no compatibility issues with other patches.

Method of evaluation

For each of the two fonts a line of text is placed on the patch. Below a reference image shows the correct rendering. If the line of text above is different from the reference image below then there is a problem...
