

GWG 22.0 – Color Conversion Indicator

Intent

The purpose of this patch is to show if a color conversion took place.

The patch contains a grey rectangle (66% K) with transparency blending mode Hard Light:

Testing guidelines

The test patches may be used in two ways:

- The patch may be used by itself to test if a color conversion takes place.
- The patch may be grouped with other patches on a page to test the whole of a workflow that will aggregate multiple files together, e.g. for partial page advertisements in a magazine.

Method of evaluation

If a color conversion (e.g. ink saving) reduces the level below 50% then the dark background and the grey cross become visible:

NOTE: This does not necessarily mean that the output workflow is wrong!

Patch Creation

This patch was created with Adobe InDesign CS6 and exported to PDF/X-4.
